2101-0027	Dyna 2000I PC Programmable Ignition Module While not strictly necessary on a basic conversion like this, this ignition module will let you get the most out of the engine kit. With it, you can select an appropriate ignition curve for your bike, for maximum power while avoiding detonation. Static time it per the instructions, set it on curve 4, and it'll be perfect. If you choose to retain your stock ignition, you can make it work by backing down the timing per the kit tuning instructions, however, the curve won't be optimal for the engine kit.	1	265.95	265.95T
